Managing Directors: Guido Gerlach,  
Constantin Wenzlik

## **CONDITIONS OF PARTICIPATION "90 DAYS OF EARNINGS"**

The PADCON 90-Day Yield Challenge is open to all customers in Germany, France, the Netherlands, Belgium, Italy, Israel, Spain and the United Kingdom, who purchase a Float Controller after 01.12.2020 in reference to the 90-day yield challenge. The following requirements must also be met:

1. The output of the PV system that is to be equipped with the float controller is not greater than 1 MWp.
2. The customer grants PADCON GmbH access to the monitoring system of the PV system for the 90-day test period.
3. The monitoring system must at minimum display the daily yields of the individual inverters.
4. The PV system is equipped with at least 2 solar inverters, of which at least one inverter is not connected to a float controller for the 90 day test period.
5. The customer informs PADCON GmbH of the name, location and size of the PV system before the devices are put into operation.
6. It is not available to customers in other countries. The products must have been purchased exclusively from PADCON GmbH or one of our participating sales partners, Timeless-planet GmbH and Girasol. Products from other authorized PADCON dealers will not be accepted. The period of 90 days begins with the commissioning date of the corresponding float controller devices.

At the end of the 90-day test period, the yields of the parts of the plant that are equipped with a float controller are compared with the yields of the parts of the plant without a float controller using the monitoring data. If the increase in yield is less than 3%, the customer can send the float controller back to PADCON GmbH and will then be reimbursed the full purchase price.

Participation in the PADCON 90-day yield challenge is possible until April 1st, 2022.
